

CALL FOR APPLICANTS

At 2430 Group, we seek applicants to contribute to term projects. We need OSINT researchers, data scientists, linguists, and forensic financial analysts. Our research focuses on the intersection of international affairs and commerce. All of us have an interest in the power of data. A native proficiency in the English language is required.

Job Description

Being part of 2430 Group's term project team means entering an eclectic network of researchers who have significant backgrounds in government, the private sector, and the nonprofit world. Participants will:

- Contribute to multifaceted projects.
- Collaborate with cross-functional teams on diverse tasks and objectives.
- Deliver original analytical research.
- Assist in drafting comprehensive issue papers spanning multiple topics.
- Monitor developments in national security, foreign policy, and other related fields.

Preferred Qualifications

- A Bachelor's, Master's, or higher qualification in pertinent domains such as data science, social sciences, political analysis, forensic finance, etc.
- Strong interest in research, data analysis, problem-solving, and specialized areas depending on the role applied for.
- Excellent written, verbal, and organizational skills.
- History of successful collaborations in diverse teams.
- Experience prioritizing among tasks.

Compensation: Payment will be competitive and commensurate with the nature of the term project and the applicant's expertise.

Application: Please forward the subsequent details to applications@2430group.org.

- Updated CV/Resume
- Relevant Certifications
- Writing Sample
- A Cover Letter including:
 - Explanation of how working with 2430 Group aligns with your professional aspirations.
 - Elaboration on your most noteworthy work experience and its significance.
 - Any unique skills or qualifications not underscored in your CV or certifications (e.g., language proficiency, military/government experience, special accreditations, etc.).
